Evidence layers
1. Author statements (papers)
2. Deposited sequence data
3. Public implementation code
4. Historical execution (not directly observed)
Layers 1–3 do not by themselves establish layer 4
separate questions
Separate audit dimensions
Completeness of the negative version
complete / partial / not verified
Membership relationship
relationship to a stated reference
Partition identity
same fixed members / own split / partial / pool
No single composite score:
the dimensions can disagree
